

SRI LANKA INSTITUTE OF INFORMATION TECHNOLOGY

**Enterprise Standards and Best Practices for IT Infrastructure**

**4<sup>th</sup> Year 2<sup>nd</sup> Semester 2014**

Name: K.W.C.Jayadewa

SLIIT ID: IT13136598

Practical Session: WD

Practical Number : lab-3

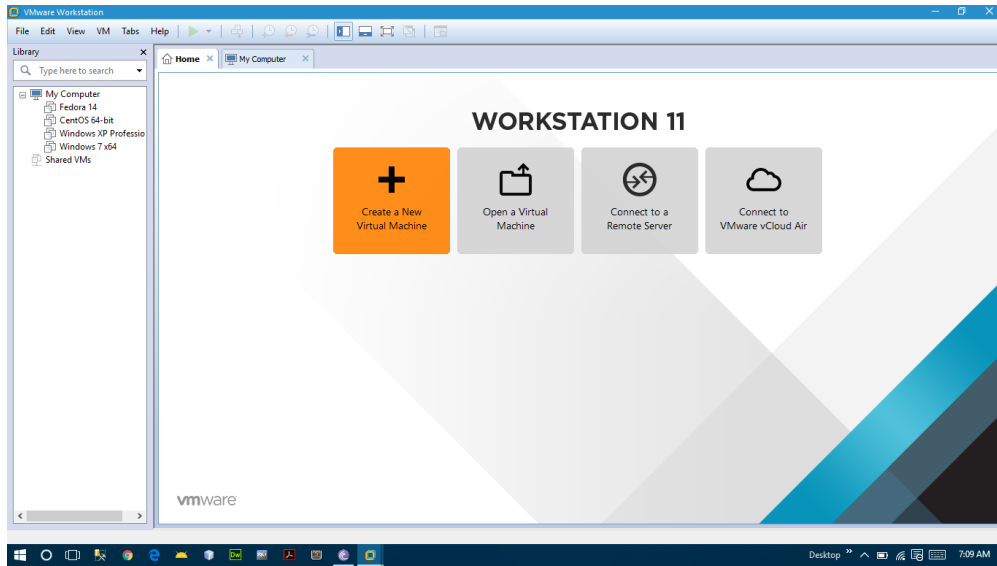

Date of Submission: 16-08-2016

Date of Evaluation : \_\_\_\_\_

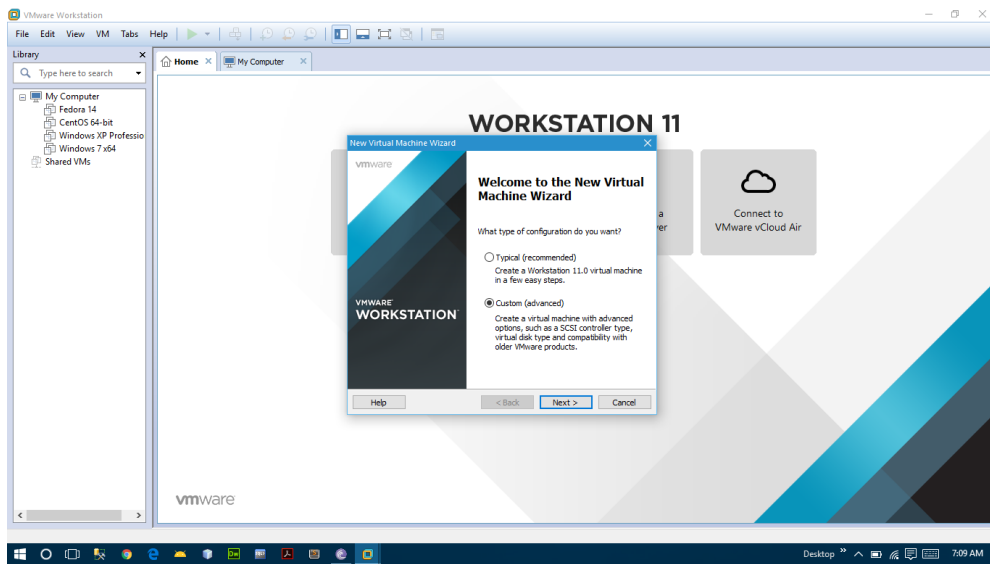

Evaluators Signature : \_\_\_\_\_

# Baremetal Virtual machine Installation

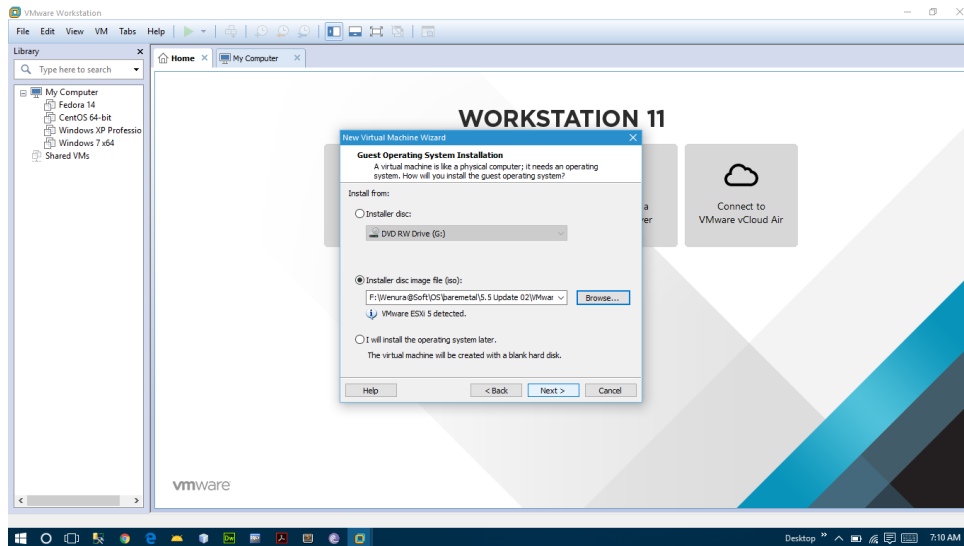

1. Open VMware select the “create a new virtual machine”.

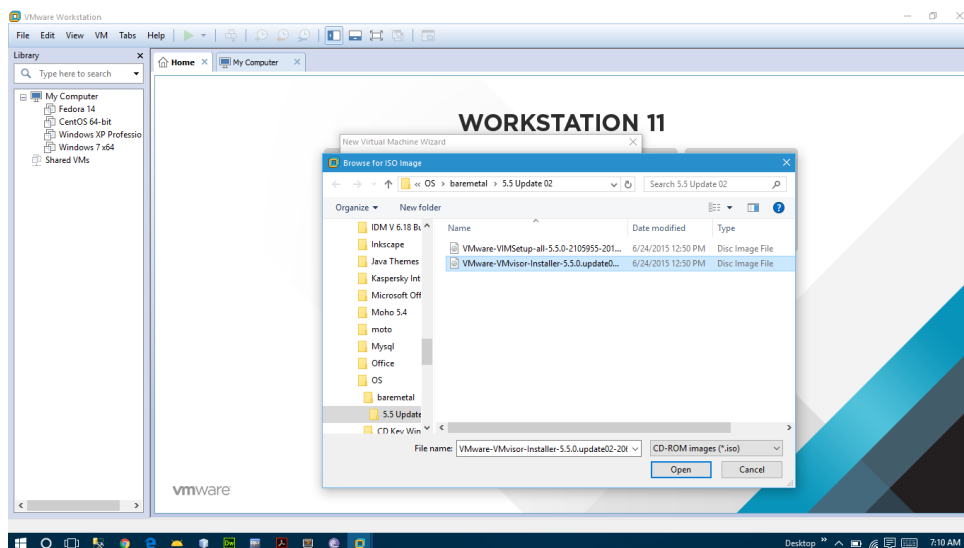

2. Select the “custom” option and click the next.

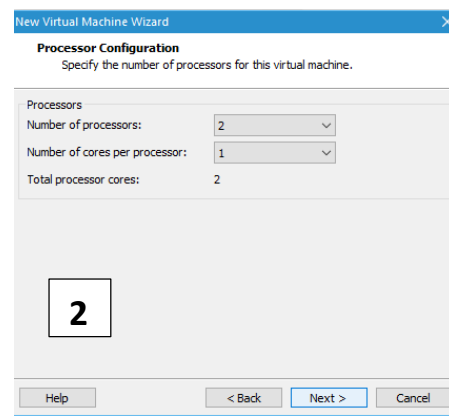

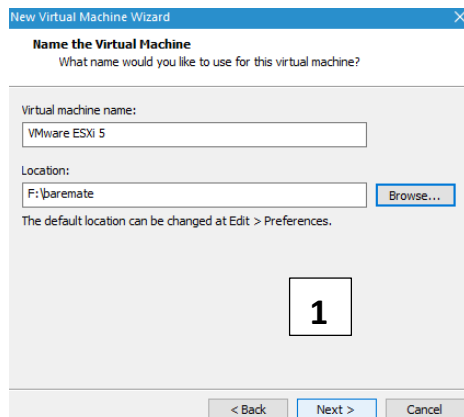

3. Select the installer disc image file and click the “browse” option.

4. Brows baremetal image in your computer then open the file.

5. No need change default settings, therefore click “next” option .

New Virtual Machine Wizard

**Memory for the Virtual Machine**  
How much memory would you like to use for this virtual machine?

Specify the amount of memory allocated to this virtual machine. The memory size must be a multiple of 4 MB.

Memory for this virtual machine: 4096 MB

Maximum recommended memory: 6304 MB

Recommended memory: 4096 MB

Guest OS recommended minimum: 4096 MB

New Virtual Machine Wizard

**Select I/O Controller Types**  
Which SCSI controller type would you like to use?

I/O controller types

SCSI Controller: ☐ BusLogic (Not available for 64-bit guests) ☒ LSI Logic (Recommended) ☐ LSI Logic SAS

5

New Virtual Machine Wizard

**Select a Disk**  
Which disk do you want to use?

Disk

☒ Create a new virtual disk  
A virtual disk is composed of one or more files on the host file system, which will appear as a single hard disk to the guest operating system. Virtual disks can easily be copied or moved on the same host or between hosts.

☐ Use an existing virtual disk  
Choose this option to reuse a previously configured disk.

☐ Use a physical disk (for advanced users)  
Choose this option to give the virtual machine direct access to a local hard disk.

7

New Virtual Machine Wizard

**Specify Disk File**  
Where would you like to store the disk file?

Disk File

One 40 GB disk file will be created using the file name provided here.

VMware ESXi 5.vmdk Browse...

9

New Virtual Machine Wizard

**Network Type**  
What type of network do you want to add?

Network connection

☐ Use bridged networking  
Give the guest operating system direct access to an external Ethernet network. The guest must have its own IP address on the external network.

☒ Use network address translation (NAT)  
Give the guest operating system access to the host computer's dial-up or external Ethernet network connection using the host's IP address.

☐ Use host-only networking  
Connect the guest operating system to a private virtual network on the host computer.

☐ Do not use a network connection

New Virtual Machine Wizard

**Select a Disk Type**  
What kind of disk do you want to create?

Virtual disk type

☐ IDE ☒ SCSI (Recommended) ☐ SATA

6

Help < Back Next > Cancel

New Virtual Machine Wizard

**Specify Disk Capacity**  
How large do you want this disk to be?

Maximum disk size (GB): 40.0

Recommended size for VMware ESXi 5: 40 GB

☐ Allocate all disk space now.  
Allocating the full capacity can enhance performance but requires all of the physical disk space to be available right now. If you do not allocate all the space now, the virtual disk starts small and grows as you add data to it.

☒ Store virtual disk as a single file

☐ Split virtual disk into multiple files  
Splitting the disk makes it easier to move the virtual machine to another computer but may reduce performance with very large disks.

New Virtual Machine Wizard

**Ready to Create Virtual Machine**  
Click Finish to create the virtual machine and start installing VMware ESXi 5.

The virtual machine will be created with the following settings:

Name: VMware ESXi 5  
Location: F:\baremate  
Version: Workstation 11.0  
Operating System: VMware ESXi 5

Hard Disk: 40 GB  
Memory: 4096 MB  
Network Adapter: NAT  
Other Devices: 2 CPU cores, CD/DVD, USB Controller

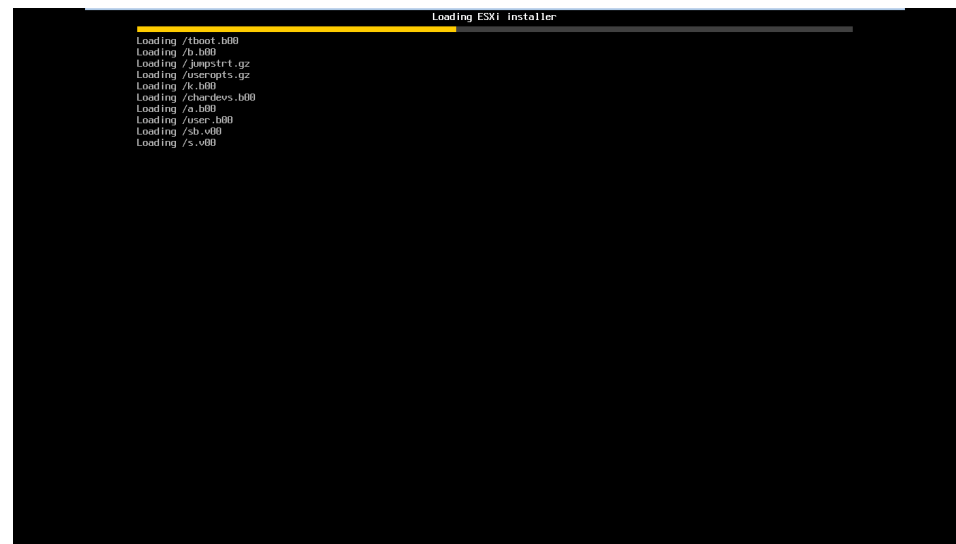

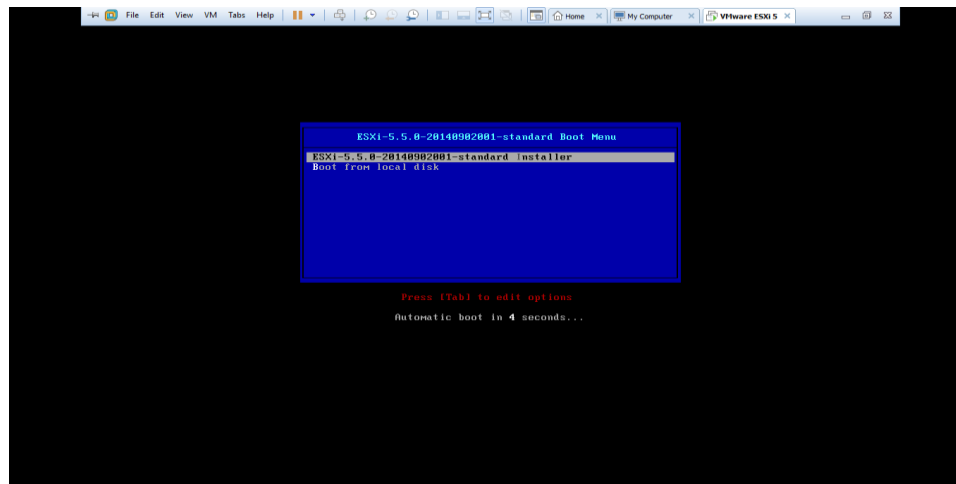

10

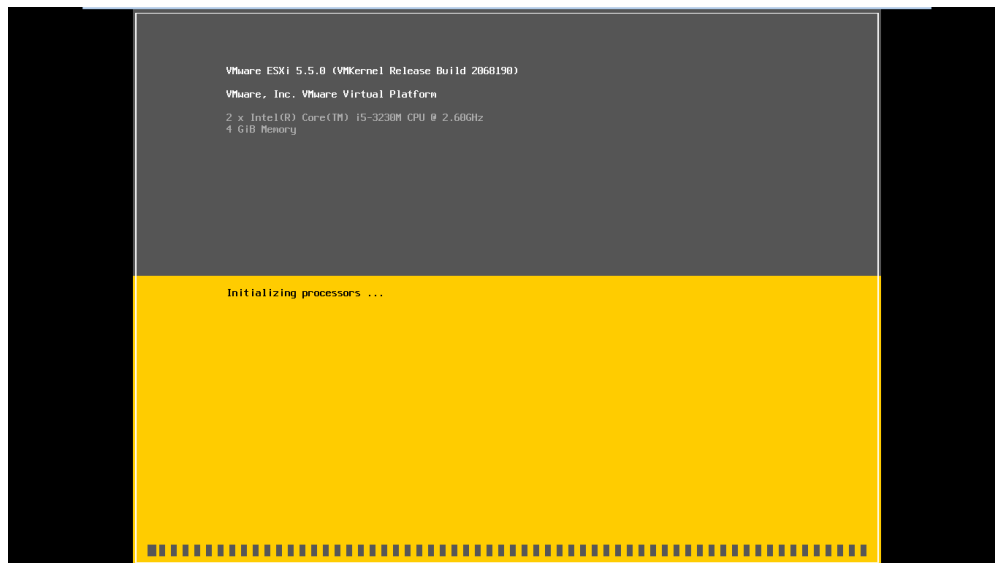

Customize Hardware...

☒ Power on this virtual machine after creation

< Back Finish Cancel

## 6. Then run the baremetal server

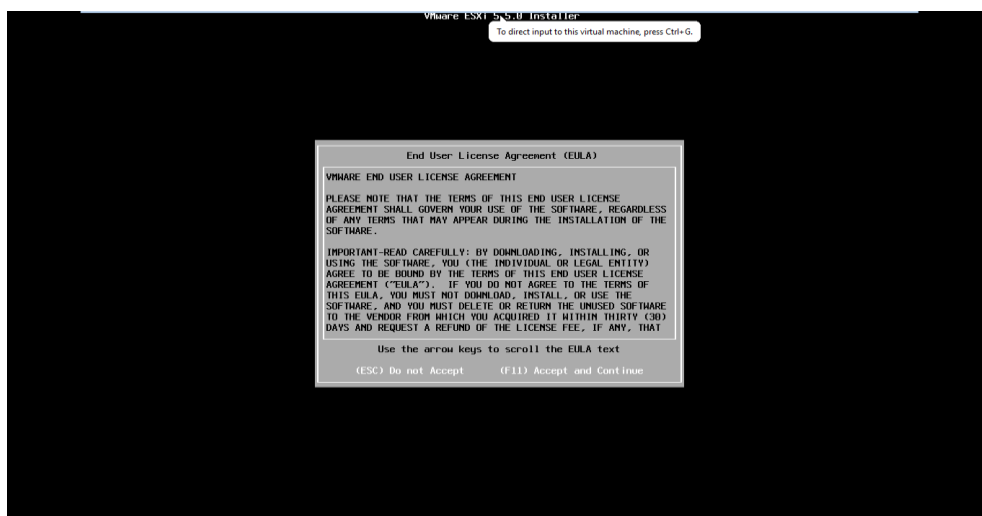

## 7. Press Enter to setup the baremetal

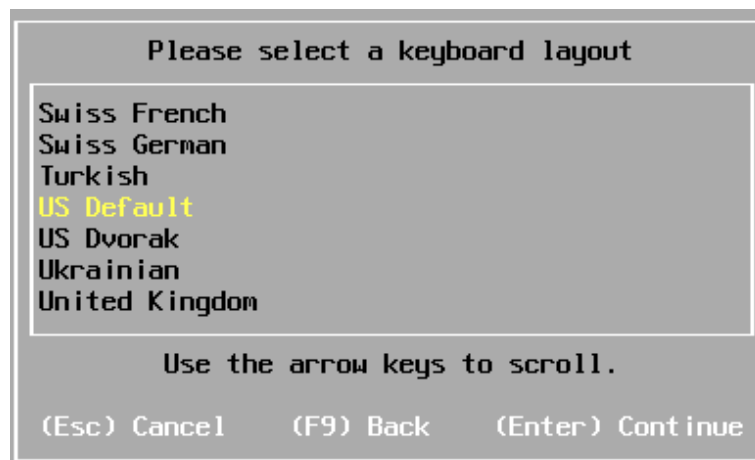

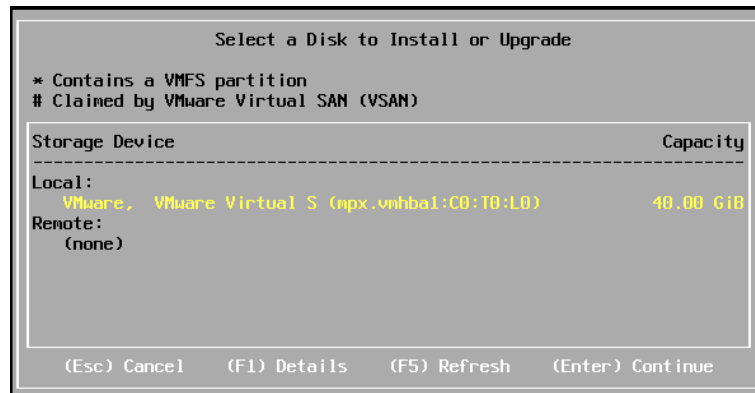

## 8. Then press F11 accept license

9. After accepting automatically check the hardware requirement

10. Select disk to install and press Enter button

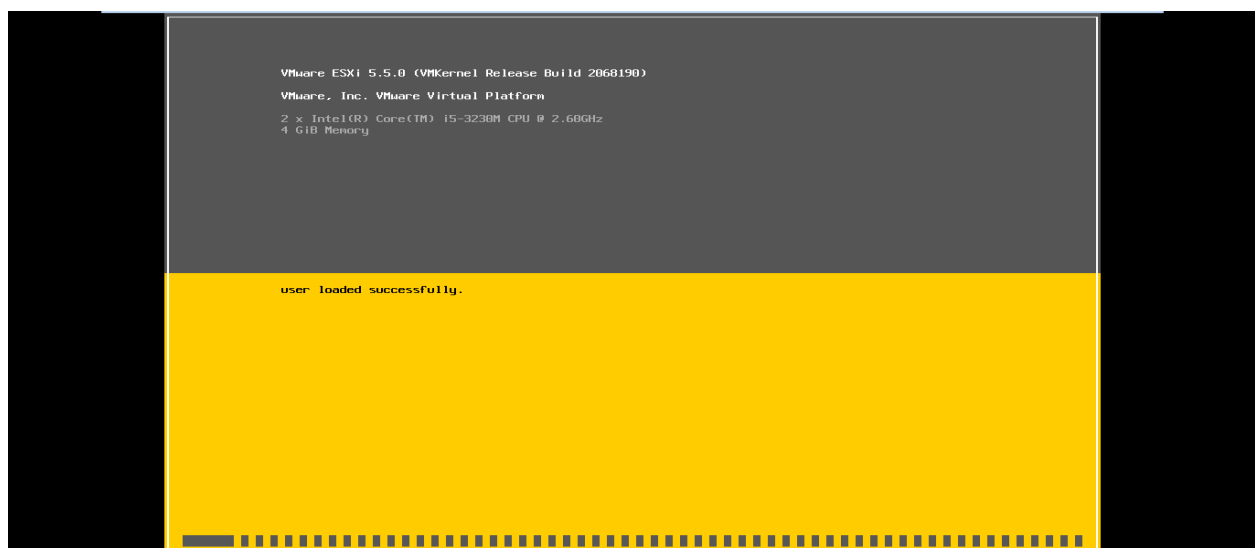

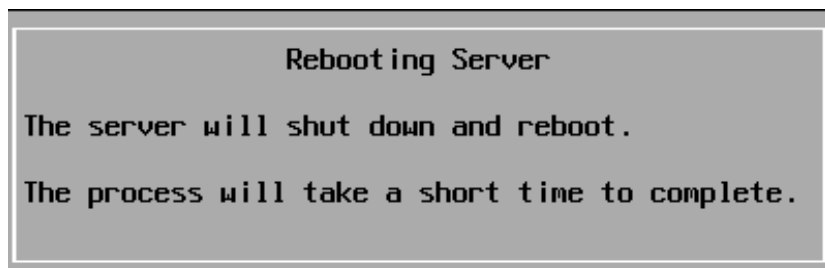

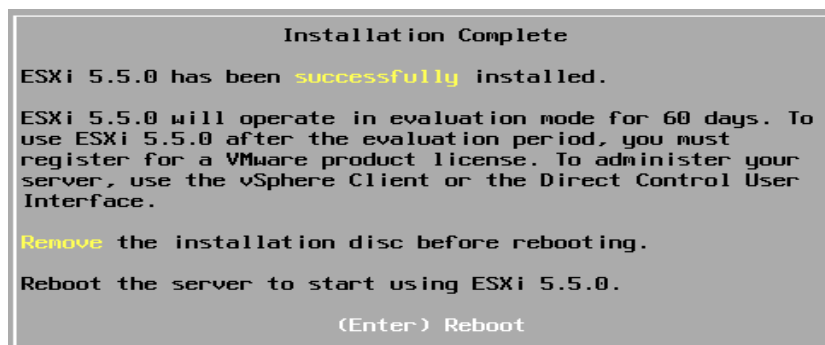

11. Set a password to ESXI

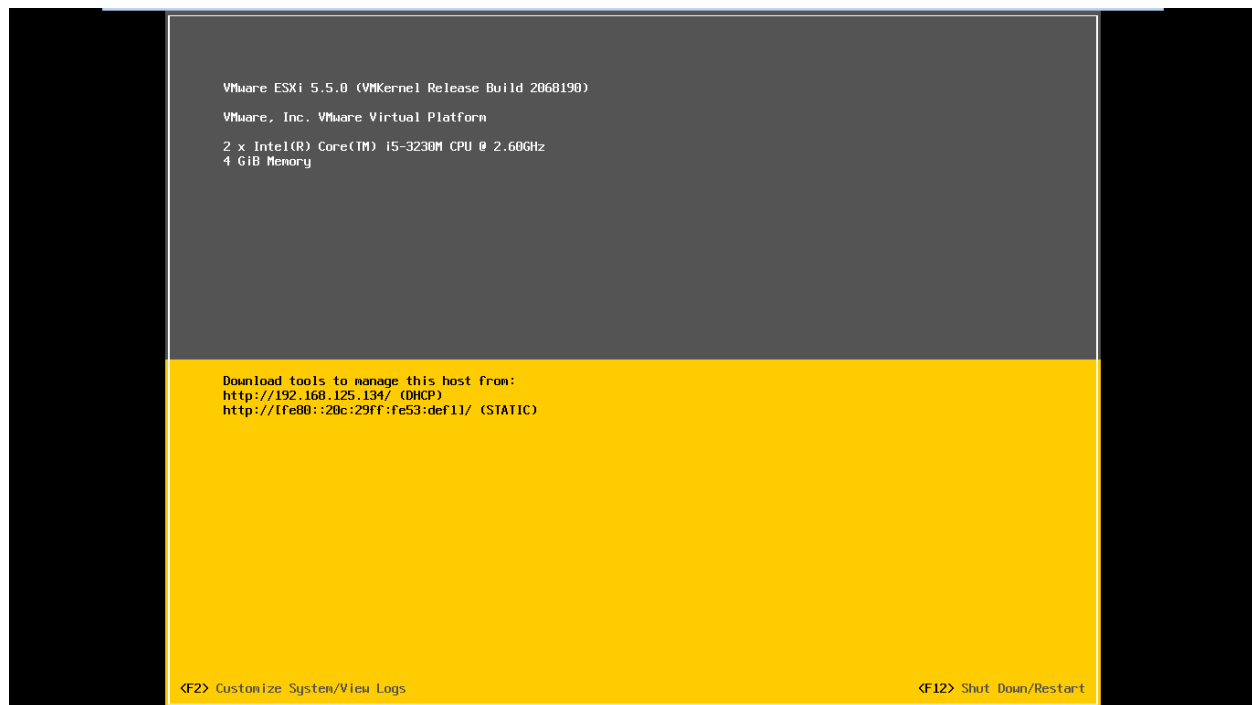

12. Confirm the baremetal installation.

13. Reboot the baremetal and press the Enter

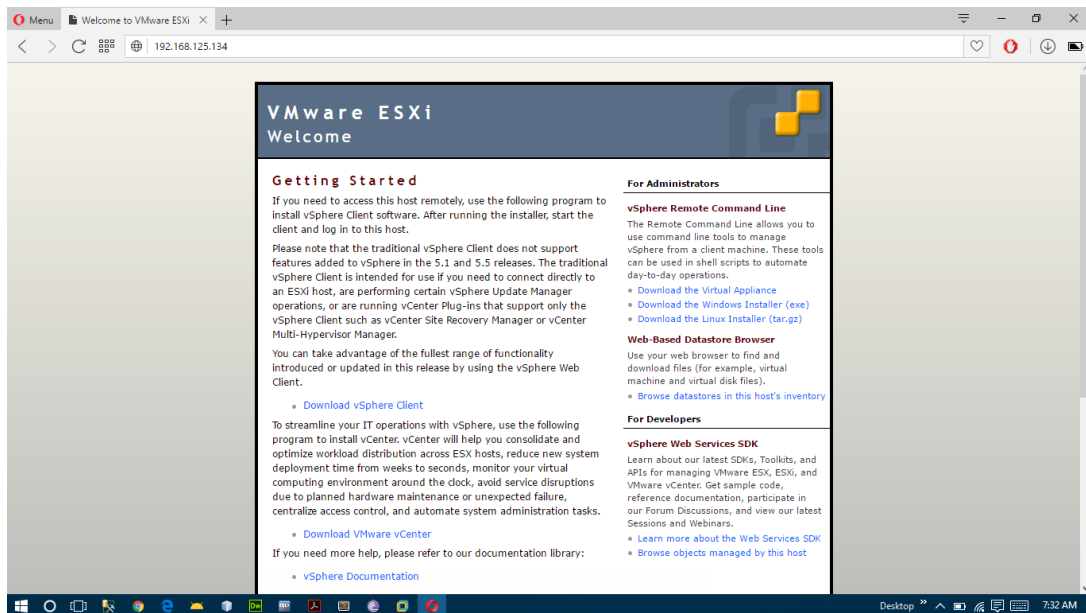

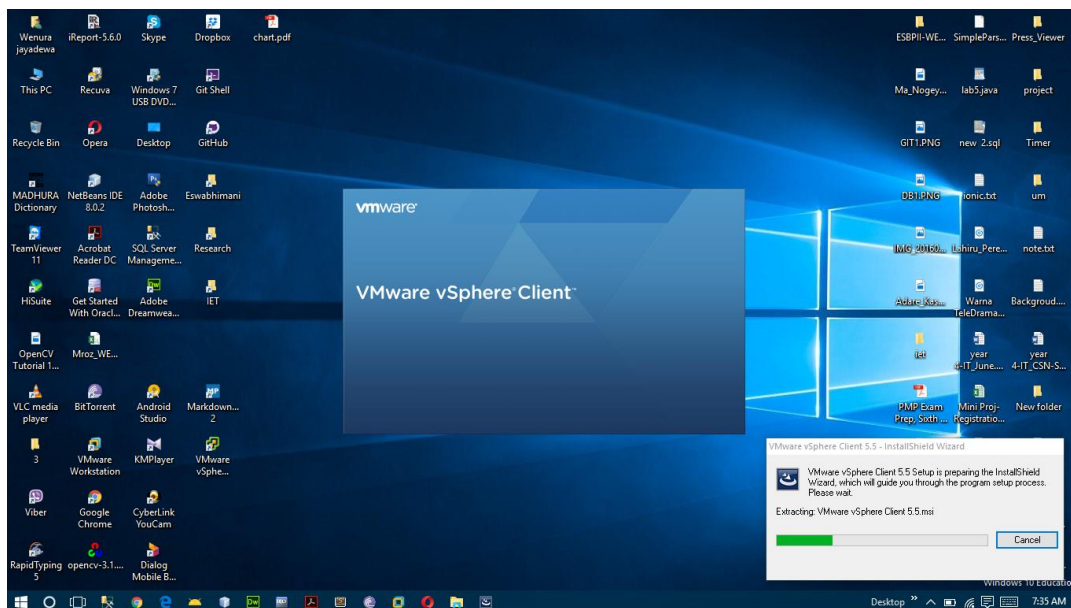

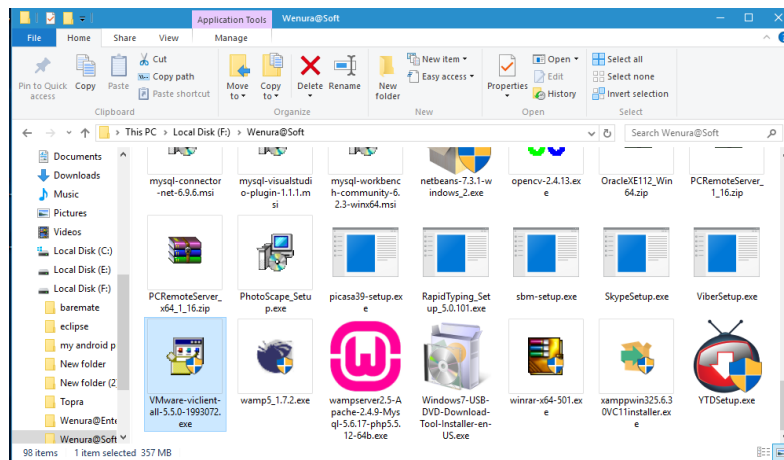

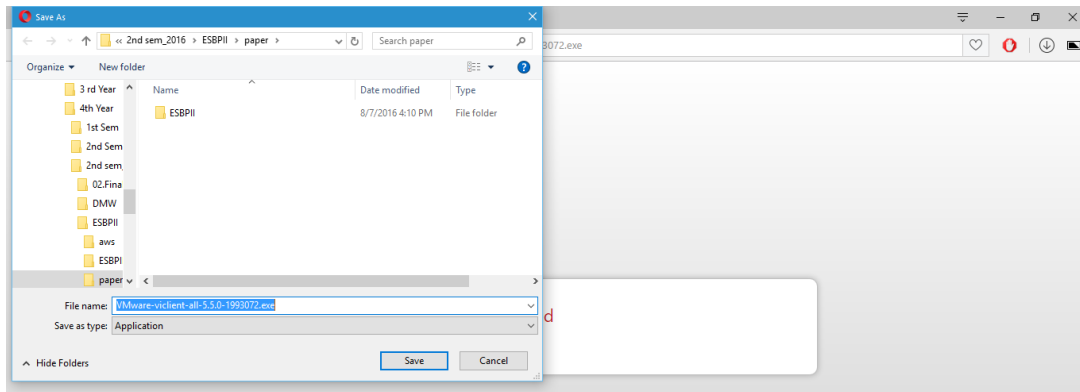

- **Install the operating system to ESXI**

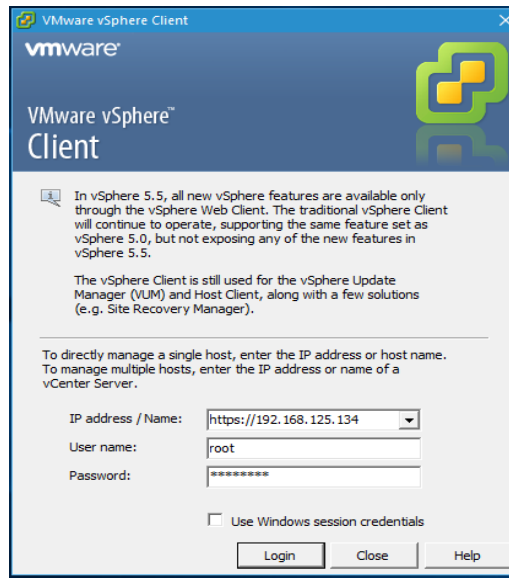

14. Open the browser in your computer and type the ip address in ESXI then press Enter.
15. Click the download vSphere client .

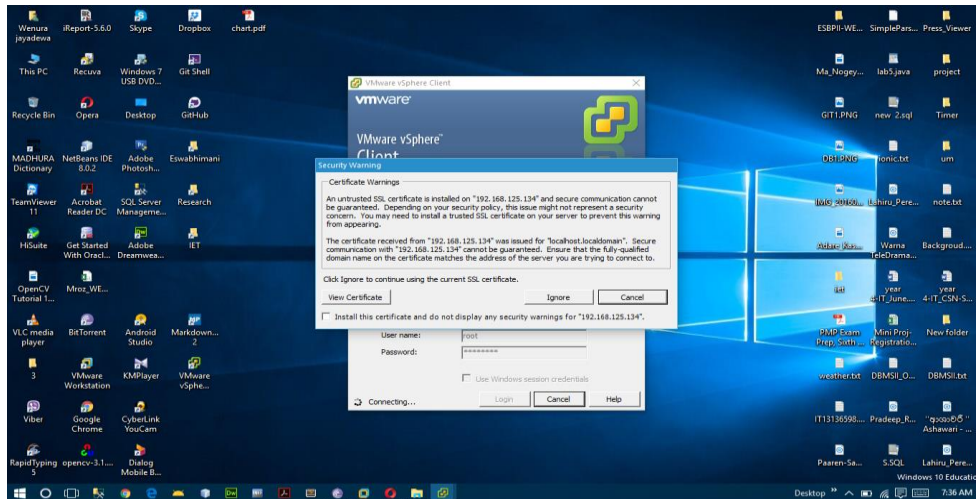

## 16. Download the exe file and install it into the machine

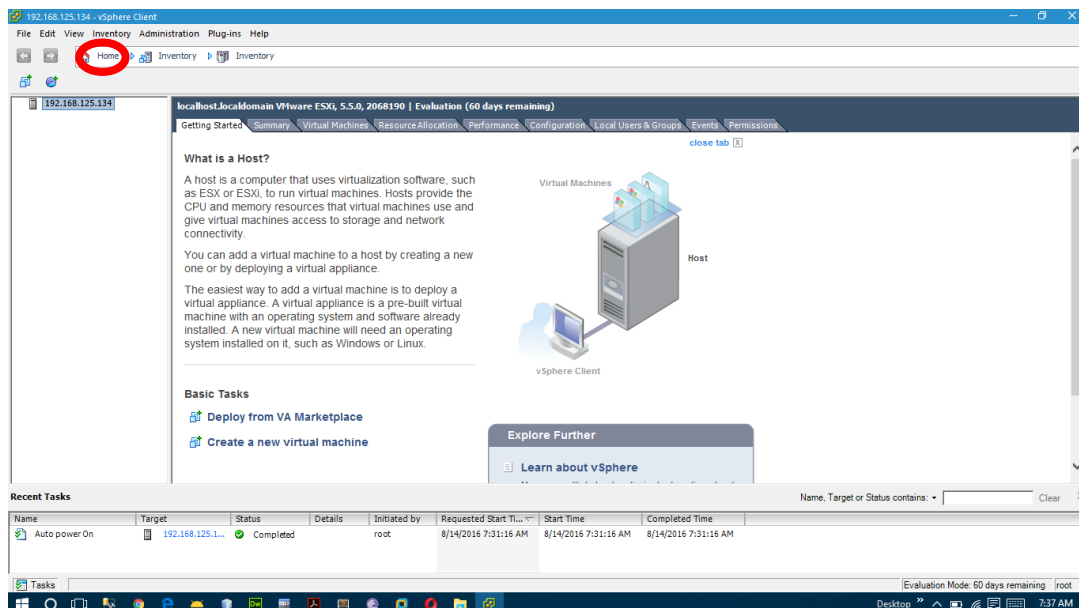

17. Run the vmware vsphere and fill the IPaddress username password

18. Click ignore button to ignore the security warning message.

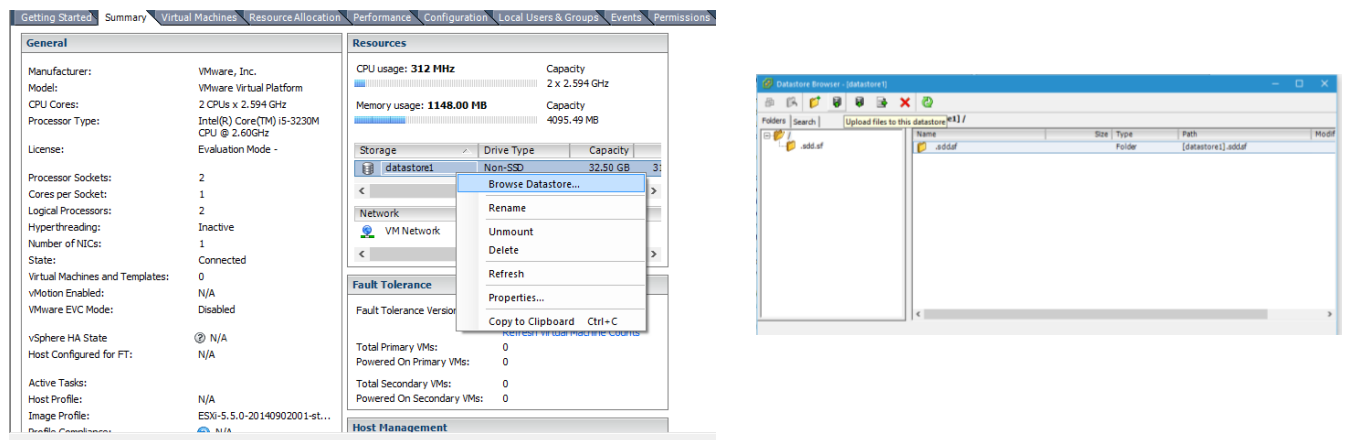

19. When successfully completed vmware vsphere your window will look like below.then click the home tab.

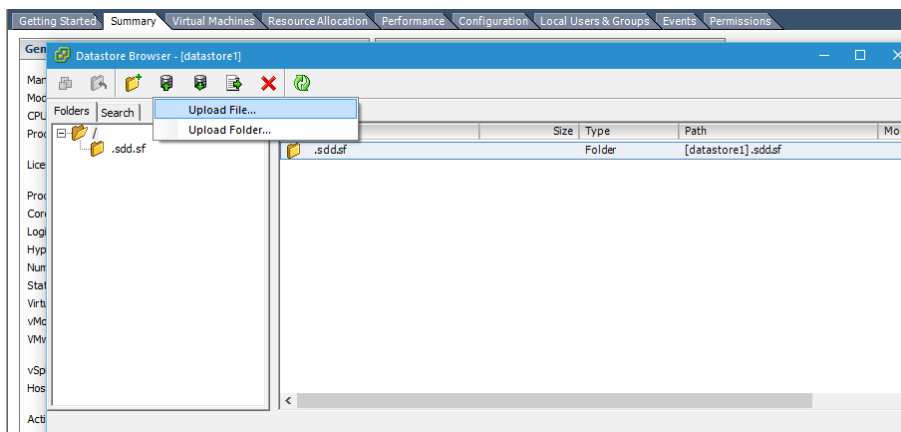

20. Select and double click on inventory icon

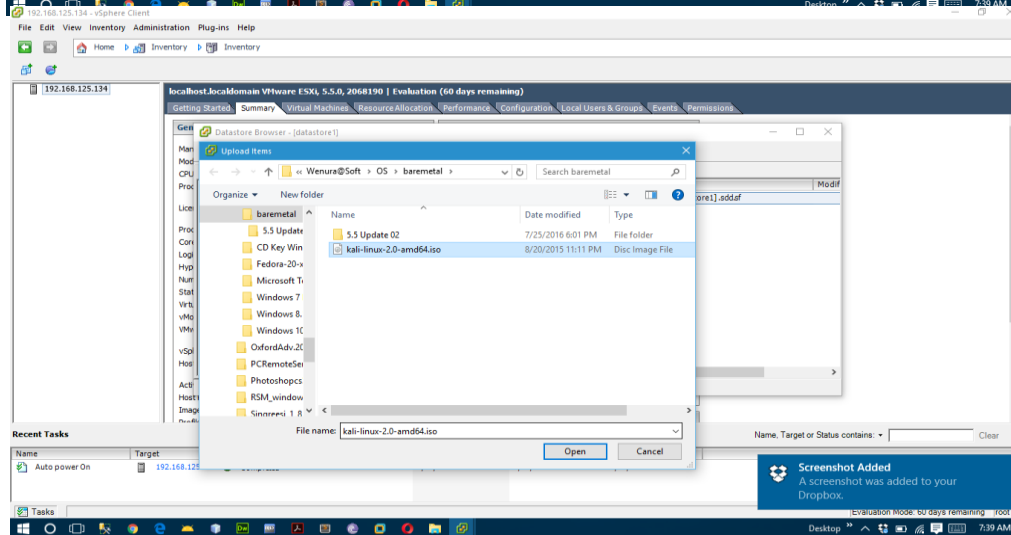

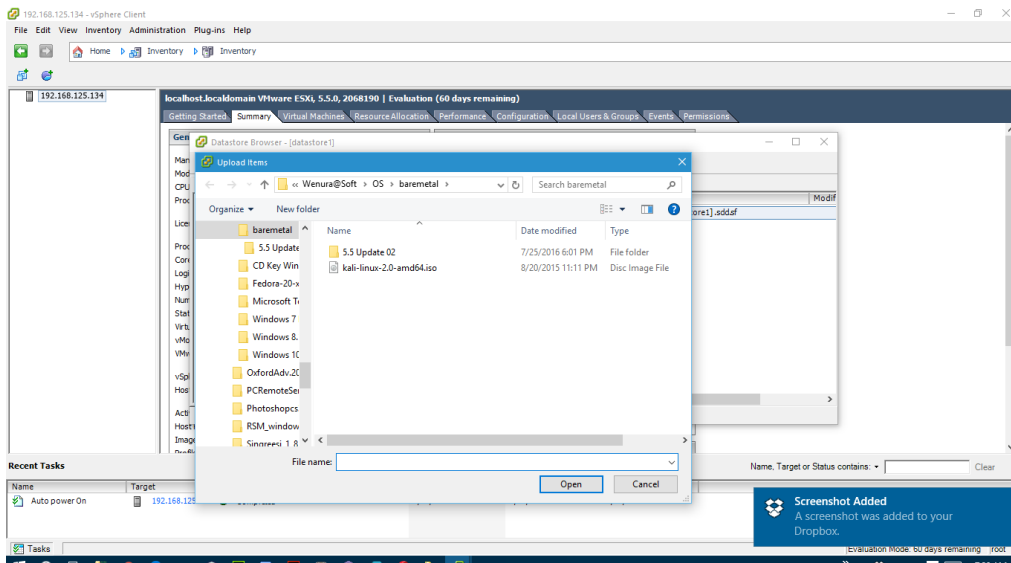

21. Go to the summary tab select dataset and right click the dataset. Then open the dataset.

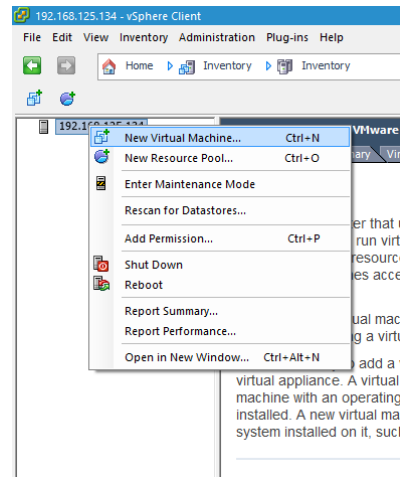

22. Select the upload button .upload the operating system.

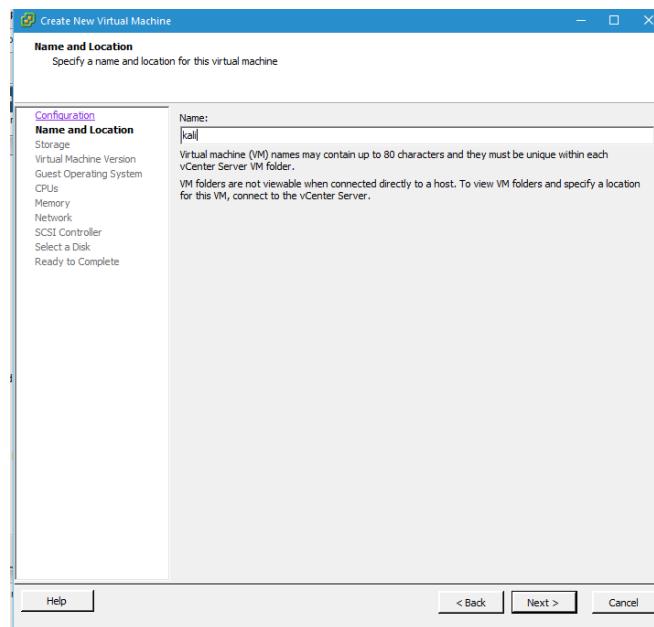

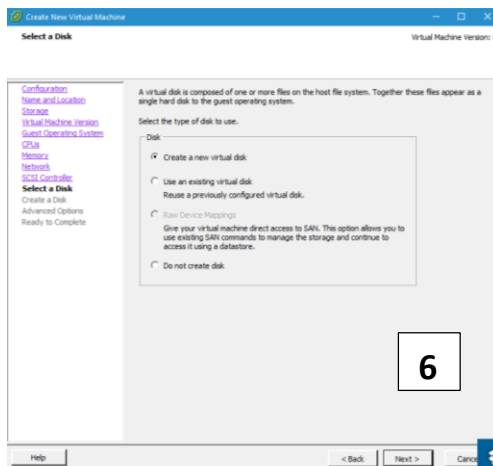

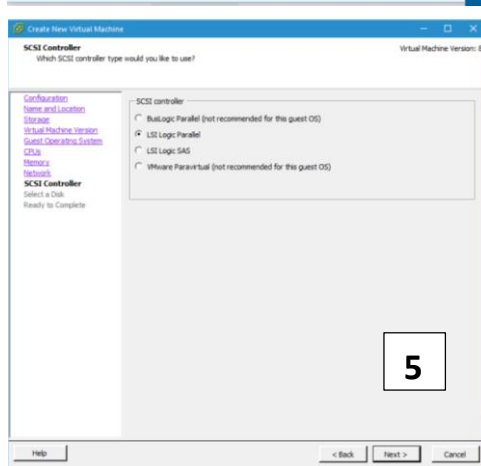

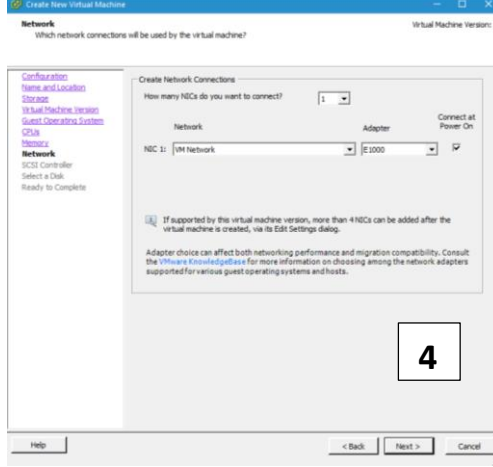

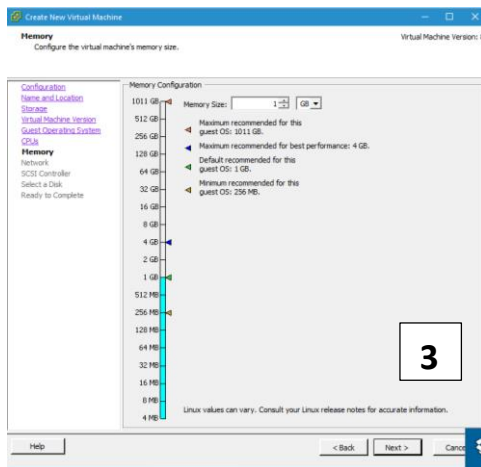

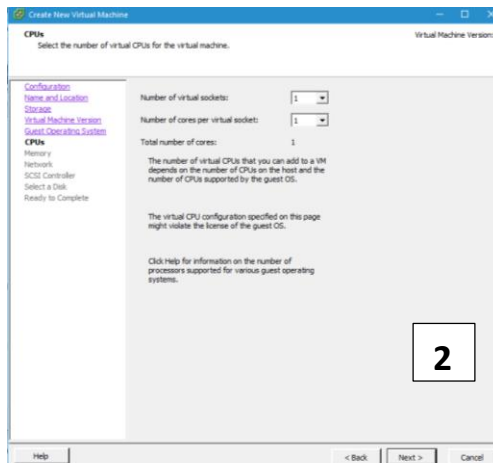

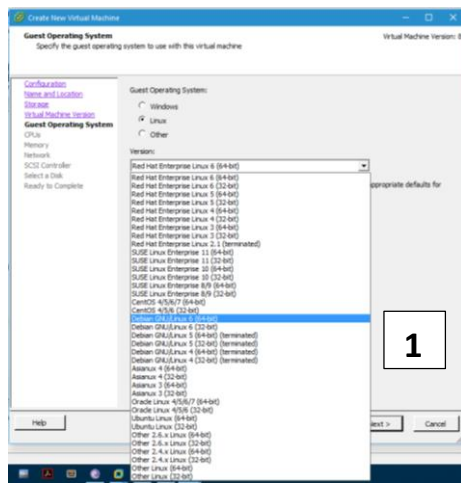

- Install the Operation system into virtual machine
23. Right click the Ip address then select the “new virtual machine” option.

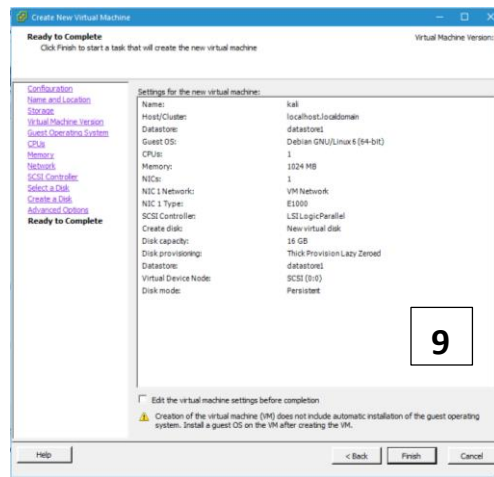

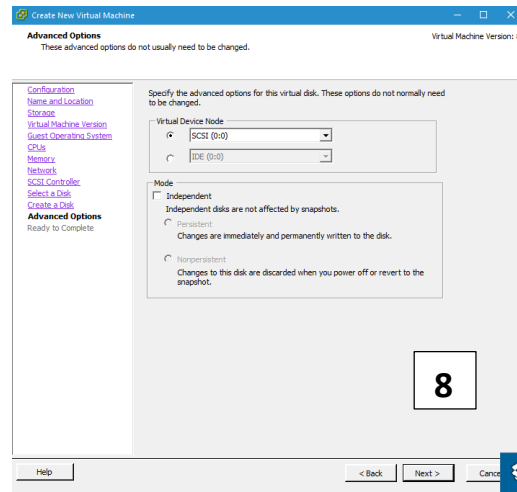

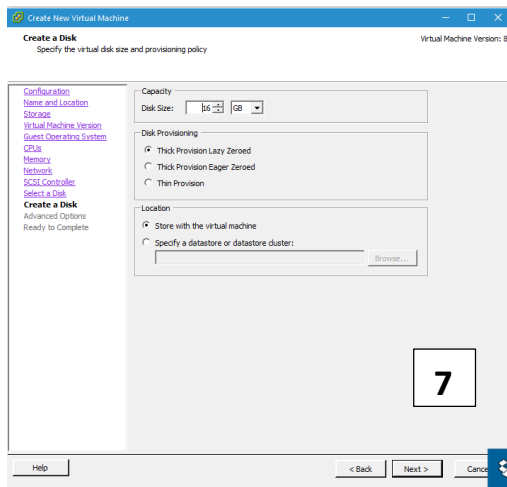

24. Set the virtual machine name and click next.

25. If you want change configurations details you can do according to following windows .if not click next button

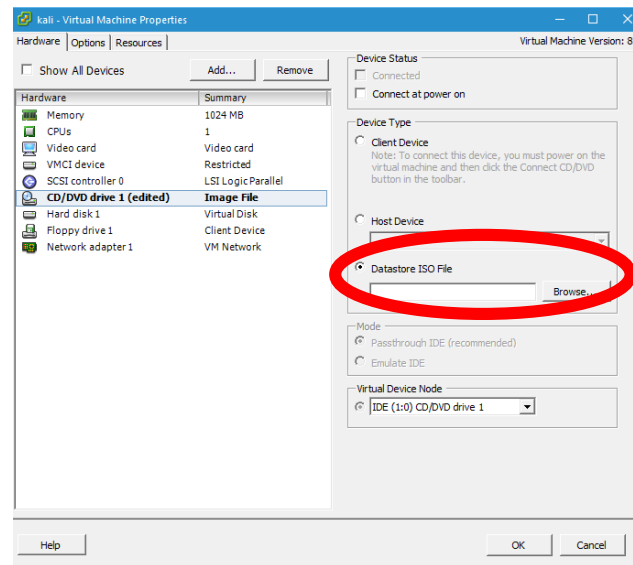

26. Right click the operating system name and select the edit setting.

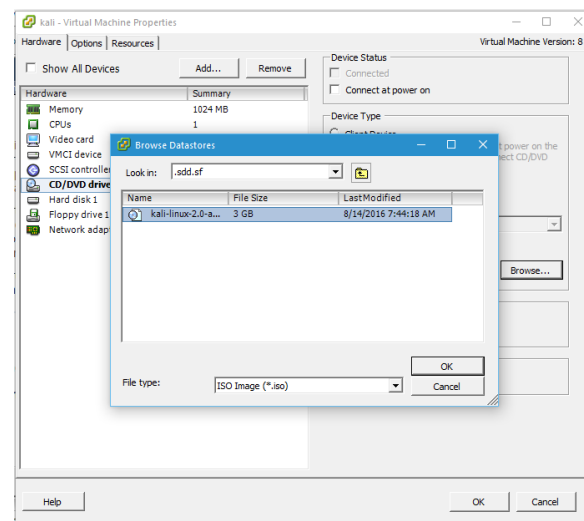

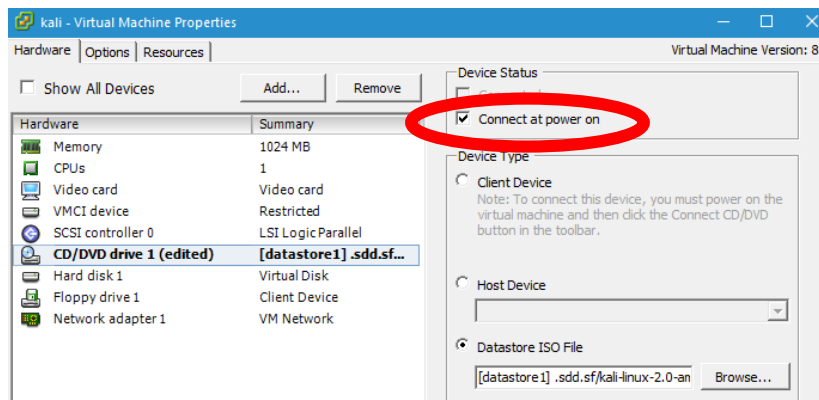

27. In edit window go to hardware tab and select the CD/DVD drive hardware. Then select datastore ISO file.

28. Browse the ISO file

29. Finally select connect od power on in the device status section

### 30. Power on the virtual machine and run the operation system .
